INNOTECH®

INNOTECH ENGINEERING DEVICES PRIVATE LIMITED

Manufacturer of Testing Machines & Laboratory Equipment

COMPUTERIZED SPRING TESTING MACHINE

For Spring Load, Deflection and Performance Testing

Spring Testing in Progress

Load vs. Deflection Graph (Software View)

KEY FEATURES

- Computerized testing and result display
- Load measurement through load cell
- Digital displacement measurement
- Load-deflection analysis
- Computer-based data recording
- Test report generation (as per software configuration)
- Customised testing fixtures
- Testing capacity as per customer requirement

SPRING TYPES

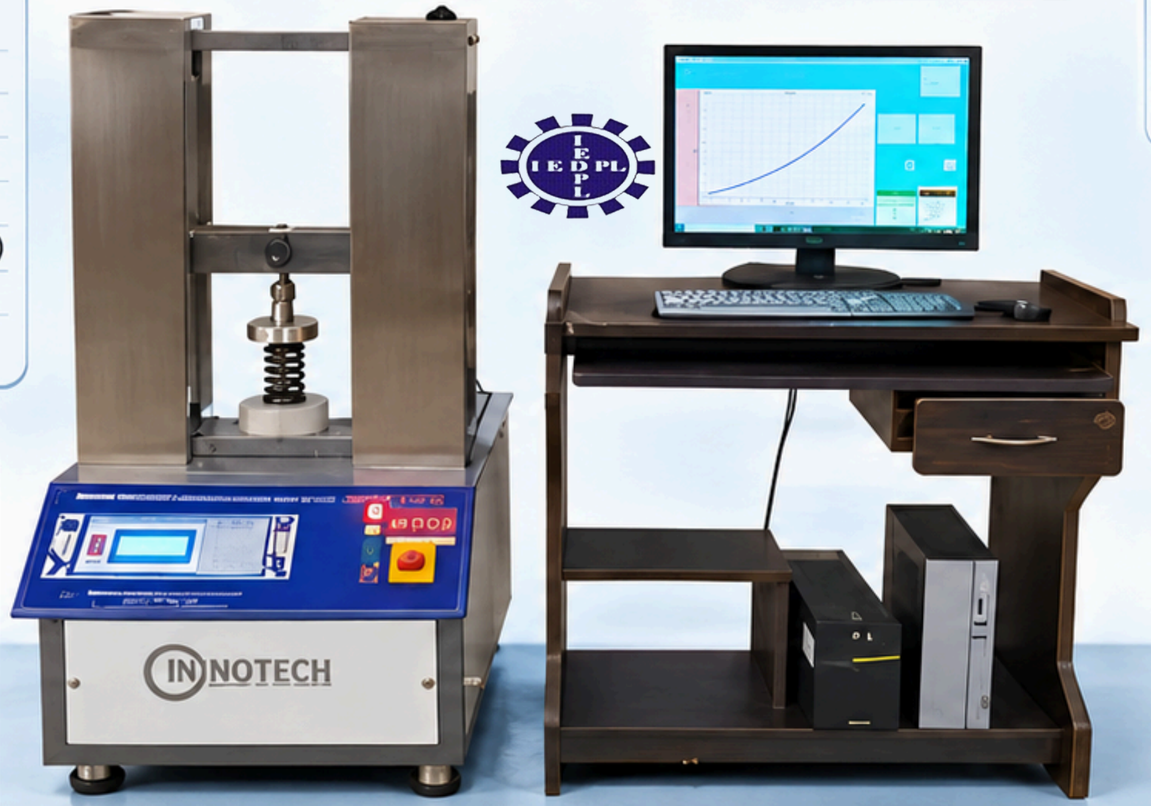

Compression Springs

Tension / Extension Springs

Other Special-Purpose Springs
(Subject to Machine Configuration)

TECHNICAL INFORMATION

Machine Type	:	Computerized Spring Testing Machine
Load Capacity	:	Customised as per requirement
Measurement	:	Load and displacement
Control	:	Computerized
Software	:	Spring testing and result analysis
Fixtures	:	As per spring type

Technical Specifications Can Be Customised as per Customer Requirements.

APPLICATIONS

Automobile and Automotive Components

Industrial Spring Manufacturing

Electrical and Electronic Components

Machinery and Engineering Products

Furniture and Seating Components

Quality Control and Testing Laboratories
