INNOTECH®

INNOTECH ENGINEERING DEVICES PRIVATE LIMITED

OEM Manufacturer of Testing Machines & Laboratory Equipment

SPRING TESTING MACHINE

Accurate Spring Load, Compression and Deflection Testing

A precision testing machine designed to evaluate spring force, load, deflection and overall performance for quality assurance and product development.

Testing Area (Close-up View)

KEY FEATURES

- Spring load measurement
- Deflection measurement
- Spring performance evaluation
- Industrial quality-control testing
- User-friendly operation
- Custom configurations

TECHNICAL SPECIFICATIONS

Maximum Capacity	:	Customised as per customer requirement
Testing Type	:	Compression / Tension / As per requirement
Load Measurement	:	Load cell based
Displacement Measurement	:	Digital (Encoder based)
Control System	:	Digital / Computerized
Display	:	Digital display
Software	:	Spring testing and result analysis software
Power Supply	:	As per standard specification
Customization	:	Available as per customer requirement

Technical Specifications Can Be Customised as per Customer Requirements.

APPLICATIONS

Automotive Springs

Industrial Springs

Compression Springs

Suspension Components

Spring Manufacturing Quality Control
