Innotech Engineering Devices Pvt Ltd

COMPUTERISED UNIVERSAL TESTING MACHINE

Precision Material Strength & Performance Testing

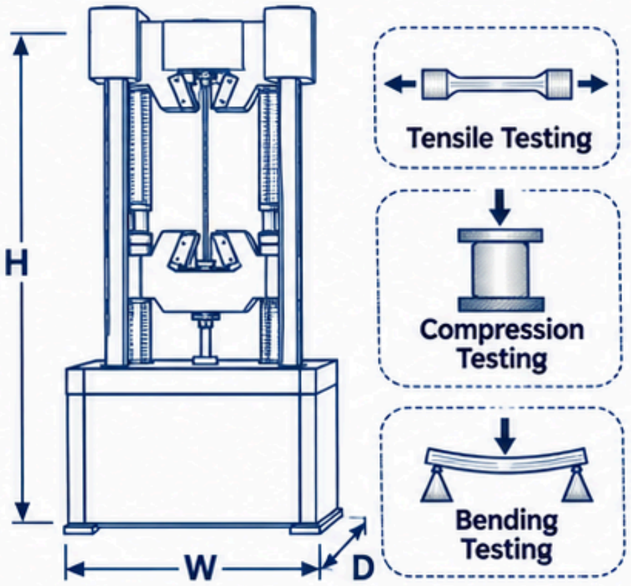

TECHNICAL SPECIFICATIONS

Testing Capacity	Customized as per customer requirement
Control System	Customized as per customer requirement
Testing Fixtures	Customized as per customer requirement
Test Space	Customized as per customer requirement

KEY FEATURES

- Tension, Compression & Bending Testing
- Computerised Data Acquisition & Analysis
- Servo / Electro-Hydraulic Loading Control
- High Accuracy & Repeatability
- Wide Range of Grips & Fixtures (As per Application)

Machine Blueprint (Typical View)

WORKING PRINCIPLE

Grip Specimen → Apply Controlled Load → Record & Analyse Results

We manufacture testing machines customised to customer requirements.

KEY APPLICATIONS

- Metals & Alloys
- Plastics & Polymers
- Composites
- Construction Materials
- R&D & Quality Control
